Mid and West Wales Plan 2019 – 2020

Easy read version

Supporting People works to prevent and stop homelessness

We work across Wales and we are funded by Welsh Government

Our Mid and West Wales area covers over 4,000 square miles

There are nearly 516 thousand people in this area

Nearly 160 thousand speak Welsh

We need to work together to give the right support to those who need it

We have over £17 million to spend on supporting people

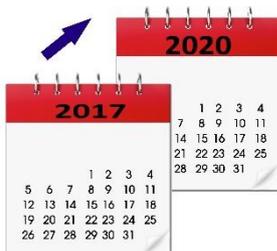

In 2017 we wrote a plan of what we want to do

A new grant called the Housing Support Grant is starting in April 2020

We are working to make sure it runs smoothly

We are working on the things we said we would do from 2017 to 2020.

1 Making better services for the right price

Planning carefully on how to deliver the right services

Making a single pathway into our services

Cutting down on paperwork and systems that slow things down

Making sure time and money are not wasted

We are making a person-centred way to check how good services are

2 Planning and delivering services

Sharing what we learn across the region

Including all groups of people, no matter what their differences are

Working across counties in the same ways

3 Working together and preventing problems

Planning services across the region with other organisations

Supporting people and projects when they try out and test new ways of working

Working with people across the region to prevent abuse and violence

Working in partnership with other professionals and organisations in the region

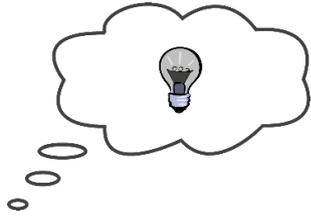

4 Getting the right people involved

Finding better ways to work with service users to help us plan in the future

Staying involved with networks, forums and individuals

Here are the things we always think about when we plan services:

- **Prevention and Early Intervention**

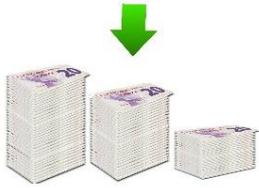

Prevention is doing what we can to make sure problems don't happen.

Early Intervention is giving the right support as soon as possible.

- **Value for Money**

Value for Money means paying the right money for what we want

- **Well-being**

Well-being is feeling healthy and good about ourselves and our lives.

- **Partnership and Co-Production**

Partnership means working together
Co-production is creating something together.

- **Being Person-Centred and Flexible**

Person-Centred means doing things a person wants in the ways that work for them.

- **Independence**

Independence means doing as much for ourselves as we can.

- **Accessibility**

Accessibility is about making sure that everyone can use services.
