

Community consultation – Wildlife in your Ward

The Carmarthenshire Nature Partnership has funding for a project to create a 'Wildlife in your Ward' profile for each ward in the county.

The West Wales Biodiversity Record Centre near Whitland can provide us with some information about nature in each ward but we really need the help of local communities from each ward who know their local area best.

We would love it if you could tell us:

- about the wildlife you see locally - what kinds of birds, mammals, fungi, plants, insects or reptiles do you see in your ward – from species you see all year round, to summer visitors, the common as well as the rare.
- your favourite walking or cycling routes where you live,
- the best places to see nature in your ward - woods, meadows, rivers, bogs, marshes, coastline, park, hedgerow or it might even be your own garden.

We would also like you to send us photos of the wildlife and habitats in your local area that we could use in the profile (all photos will be credited).

Finally, we'll need your help to let others to know how special for wildlife your ward is. One of the best ways to do this is to share it on social media - Facebook, Twitter, Instagram, Nextdoor or whatever else you are on.

Any help would be greatly appreciated. The profiles will be sent to local schools, community councils and other groups to use, share and hopefully encourage all to take a closer look at what is around us.

To find out the boundary of your ward go to:

<https://www.carmarthenshire.gov.wales/home/council-services/in-my-area/> and choose 'Electoral wards' option in the dropdown menu.

Please send your information to:

Biodiversity@carmarthenshire.gov.uk

We need to complete this project by March so if you could send your information in by **8th January 2021** that will really help us create the profiles in good time.
