

The **Carmarthenshire Nature Partnership** has produced this profile to highlight some of the wildlife, habitats, and important sites in your local area.

Carmarthenshire is justly celebrated for the variety within its natural environment, from the uplands in the north-east of the county to our magnificent coastline.

Every ward contributes to the rich and varied network of wildlife habitats that make up the county, whether that be woodlands, grasslands hedgerows, rivers or gardens.

There are still gaps in our knowledge about Carmarthenshire's natural environment and the wildlife it supports. Despite having a wealth of data, some species and pockets of special habitats

remain unrecorded and unmapped. There is always more to find out.

Wildlife and our natural environment reflect local culture and past human activity. We see this in the field and hedgerow patterns in our agricultural landscapes, and in areas previously dominated by industry where, today, new habitats develop on abandoned land. And our farm, house and street names provide clues to the history of our natural environment.

The mosaic of habitats in Gorslas make up an **ecological network**. If these habitats are well managed, are well connected and are sufficiently extensive, they will support a diversity of species and help to make a **resilient** natural environment.

A **resilient** natural environment supports wildlife and provides a range of **ecosystem services**, e.g. agricultural products, pollinators, timber, drinking water, regulation of floods and soil erosion, carbon storage and recreation and inspiration.

We hope if you will find this profile interesting and that it might encourage you to explore your local area and record what you see. There are links in the profile that will help you to find out more and take action locally.

Thank you to all those in Gorslas ward who have already sent information and photos. These profiles can be updated so please continue to send us information about the Wildlife in your Ward'.

Funded by Welsh Government through the Local Nature Partnership Cymru project.

Produced by Carmarthenshire County Council for the Carmarthenshire Nature Partnership

For further information please contact: [Biodiversity@carmarthenshire.gov.uk](mailto:Biodiversity@carmarthenshire.gov.uk)

Geology has been fundamental in shaping the varied landscapes of Gorslas ward. Since the expansion of coal mining, the landscape has continued to change as development continues and settlements expand. Here though, farming has continued alongside industry and little of the land has been intensively farmed and it can support a rich biodiversity. Nineteenth century enclosures of previously open land resulted in a field pattern with straighter boundaries than those in the countryside elsewhere and can still be seen in the fields around Gorslas and Cefneithin. Here there are marshy grasslands (rhôs pastures), where the purple devil's bit scabious flowers in late summer and which are home to the marsh fritillary butterfly. This area is one of the most important for this butterfly in Wales.

The mature hedge banks provide a network of habitats used by dormice and bats. Carmarthenshire's limestone ridge runs east/west to the north of Gorslas through Llyn Llech Owain Country Park and this adds further diversity to the landscape, providing great views over much of Carmarthenshire. In the park the woodland, heathland, peat bog and the lake provide a diversity of important habitats. This is one of few lakes in the county and it is easy for the public to access.

### Special species in your ward

All the species in your ward are important in some way and help make your natural environment special. Some of the species recorded in Gorslas are listed by Welsh Government as being of principal importance for biodiversity in Wales – so your area is important. Here are some species highlights from your ward.

The hazel dormouse is a declining nocturnal animal found mainly in broadleaved woodland, scrub and hedgerows. Carmarthenshire is an important county for this mammal. Loss/fragmentation of habitat is a major cause of decline in the county as it causes the isolation of populations.

Whorled caraway is found on old damp 'rhôs' pastures and is rare across much of the UK. Its frothy blossom is in flower in July-August. It is our county flower. The 'whorl' of leaves gives it its name.

The cuckoo is a declining summer visitor to the county but with good records in your ward. An early sign of spring its 'cuck-oo' can be heard in woodlands and grasslands. Cuckoos famously lay their eggs in the nests of other birds.

Carmarthenshire has one of the most important networks of the marsh fritillary butterfly in Wales. The beautiful adults can be seen in May–June, when they lay eggs on the leaves of the devil's bit scabious plant in damp pastures – important for many species.

Round-leaved sundew is a bog plant with a strange diet. Hair-like tendrils on the leaves are tipped with sticky droplets that attract and trap insects. Eventually, the whole leaf wraps around the insect which is digested by the plant.

## How can you help?

If we want to protect the wildlife in Gorslas, help from people who live here can make a real difference. There are many groups and individuals recording their local wildlife and managing areas for Nature in the county.

➡ There are very few records for amphibians and reptiles in your ward.

➡ Want to find out more about the county's special species and habitats? Why not visit the Council's biodiversity web pages and the section on Priority Habitats and Species in the county:

<https://bit.ly/3gsZgyP>

➡ Discover what is in your area – take a closer look at what is around you – let us know. It's amazing!

➡ Manage areas in your local school, village and gardens for wildlife – make space for Nature.

➡ Get involved with a local conservation group – volunteer some of your time for Nature.

➡ For a range of ideas visit: <https://bit.ly/2EENrZ6>

## Help record the species in your area

West Wales Biodiversity Information Centre (WWBIC) is a valuable source of information about the county's wildlife and anyone can contribute. Common species are often under-recorded so you don't need to be an expert.

WWBIC holds a lot of biological records for Gorslas (see the map above).

Why not record the species that you see in your garden or when you are out and about? There are several ways you can record with WWBIC, by email, on the WWBIC website or using the LERC Wales App. More information can be found here: <https://www.wwbic.org.uk/wildlife-recording/>

There are many websites that can help with species identification. If you are on social media why not join West Wales Biological Recording (<http://www.facebook.com/groups/westwalesbiorecording/>)

## Special sites in your area

This map highlights the special sites for wildlife in your ward and also places to walk and visit in Gorslas.

➔ In Carmarthenshire we have a network of 'designated' sites, protected at a national or international level – these are the best examples of particular habitats in Carmarthenshire or even the UK and/or places where important species live. They are the cornerstones of conservation work, protecting the core of our natural heritage.

Want to find out more? Visit the Natural Resources Wales website - <https://bit.ly/2YwEybo>.

**NB. These protected sites do not necessarily have public access unless they have a Public Right of Way passing through them or are Open Access Land (see next page).**

➔ Locally we also have nature reserves with important habitats and species which are managed by a range of organisations. Find out more at: <https://bit.ly/2LcLJKM>

➔ All these are numbered on the map above.

➔ Your ward has a network of Public Rights of Way (PROW). These footpaths are open to everyone to enjoy and a great way for you to explore your local area and the habitats and wildlife within it. The county also has areas of 'Open Access land'.

➔ 'Open Access land', under the CRow Act (2000), consists of open country (mountain, moor and heath land) and 'registered common land. It also includes areas of 'dedicated land' where owners, such as Natural Resources Wales, allow free access.. In these areas you can walk wherever you like, and in the NRW managed forests you can also ride a horse or a bike on the forest tracks, but please be considerate of other users.

Find out more at: <https://bit.ly/3n2tahp>

➔ PROWs include Footpaths, Bridleways, Restricted Byways and Byways Open to All Traffic. There are over 2400 km of PROW across Carmarthenshire providing different levels of off road public access from walking to horse riding and cycling, each has its own unique character, you may already have your own favourite. Find out more at: <https://bit.ly/2K7k9VK>

➔ The maps in this profile are Ordnance Survey maps (OS) – they are a great way to help you find local Public Right of Way and Open Access Land either through paper maps or through their phone App. Find out more at: <https://bit.ly/2Wi52Mo>

➔ The County also boasts numerous designated cycle paths, many of which make up part of the National Cycle network and Carmarthenshire's Active Travel network. There is over 100 km of designated cycle path in the county. Find out more at: <https://bit.ly/3gQopVC> and <https://bit.ly/3gPcck8>

➔ When you are out and about - always follow the Countryside Code: <https://bit.ly/37hFjJS>

## Local Walks/sites to explore

You may already have your own favourite walk in your patch, where you experience the seasonal changes throughout the year. You may walk the same route regularly, but wildlife will not. So, keep your eyes peeled there is always something new to see/experience. But why not try walking another way? You might see something different but also the same sights – just in a different way.

Please tell us about your favourite walk or place to visit - here are some ideas.

## General

➔ There are four local **Ramblers** groups in Carmarthenshire that explore the county. Find out more about the Ramblers' groups in Carmarthenshire: <https://bit.ly/3r6xZZn>

➔ **Walking Well Carmarthenshire** is an initiative which aims to encourage people of all ages and abilities to take advantage of the physical, social and mental health benefits offered by walking in groups of like-minded people. It does this by setting up walking groups around the County. Find out more: <https://bit.ly/2J48FCc>

➔ The **Discover Carmarthenshire** website promotes local walk and cycle routes: <https://bit.ly/3r35xYi>
