

# Wildlife in your Ward – Llanboidy-Whitland

Partneriaeth Natur  
SIR GŶR • CARMARTHENSHIRE  
Nature Partnership

The **Carmarthenshire Nature Partnership** has produced this profile to highlight some of the wildlife, habitats, and important sites in your local area.

Carmarthenshire is justly celebrated for the variety within its natural environment, from the uplands in the north-east of the county to our magnificent coastline.

Every ward contributes to the rich and varied network of wildlife habitats that make up the county, whether that be woodlands, grasslands hedgerows, rivers or gardens.

There are still gaps in our knowledge about Carmarthenshire's natural environment and the wildlife it supports. Despite having a wealth of data, some species and pockets of special habitats remain unrecorded and

unmapped. There is always more to find out.

Wildlife and our natural environment reflect local culture and past human activity. We see this in the field and hedgerow patterns in our agricultural landscapes, and in areas previously dominated by industry where, today, new habitats develop on abandoned land. And our farm, house and street names provide clues to the history of our natural environment.

The mosaic of habitats in Llanboidy-Whitland make up an **ecological network**. If these habitats are well managed, are well connected and are sufficiently extensive, they will support a diversity of species and help to make a **resilient** natural environment.

A **resilient** natural environment supports wildlife and provides a

range of **ecosystem services**, e.g. agricultural products, pollinators, timber, drinking water, regulation of floods and soil erosion, carbon storage and recreation and inspiration.

CYMRU

Forming the western boundary of the county and the confluence of the Tâf and its tributaries, agricultural practices in these wards reflect the change from lowland to more elevated land. The more exposed and often windswept elevated areas afford views of this plateau landscape, and to the west, the Preseli hills. In the many deeply incised river valleys, e.g. Tâf, Fenni and Gronw, woodland dominates the landscape, coniferous in places and elsewhere ancient oak woodlands with pockets of scrub. In spring the high hedge banks alongside the network of small lanes that criss-cross this ward support a wide range of flowering plants and ferns – primrose, bluebells stitchwort and pink campion. These lanes descend steeply into the villages such as Login and Llanglydwen with their many traditional stone buildings. The Landsker Borderlands trail passing by Whitland Abbey provides a great way to explore this landscape and learn about its history. In the south of these wards Whitland and its associated rail and road network shape this landscape. The Llanboidy windfarm and the solar farm north west of Whitland, are evidence of more recent landscape change in this area. Prehistoric features such as burial chambers and standing stones reveal that this landscape has been used by people for millennia.

### Special species in your ward

All the species in your ward are important in some way and help make your natural environment special. Some of the species recorded in Llanboidy-Whitland are listed by Welsh Government as being of principal importance for biodiversity in Wales – so your area is important. Here are some species highlights from your ward.

Twelve species of bats have been recorded in your ward. The ward's varied habitats (including buildings and gardens) provide a variety of habitats for bats. Did you know single pipistrelle can eat 3000 insects in one night?

The house sparrow is one of the most recorded birds in your wards. It is an opportunistic bird of towns, parks, gardens and farmland. Feeding on a variety of foods, they regularly visit bird feeders. They nest in colonies in holes in buildings, among ivy or other bushes, and in nest boxes.

Your wards have a number of records for grassland fungi. These include waxcaps, often brightly-coloured mushrooms with a waxy or shiny-looking cap. They are found in grasslands that are generally poor in nutrients – such as old pasture, lawns and cemeteries. Wales is very important for these grassland fungi.

Almost 30 species of butterfly have been recorded in your wards, including the Wall – a widespread but declining, butterfly. It likes to bask on walls, rocks, and stony places. It flies from May onwards and its caterpillars feed on a variety of grasses.

Swallow, swifts and house martins are all recorded in your wards. Their arrival from Africa is a sign that summer is on its way. They all use buildings to nest, and feed on insects whilst on the wing. They are declining – you can help by providing space to them to nest.

## How can you help?

If we want to protect the wildlife in Llanboidy-Whitland, help from people who live here can make a real difference. There are many groups and individuals recording their local wildlife and managing areas for Nature in the county.

- ➔ 84 fungi species have been recorded in your wards but there are only five records grass snake and common lizard.
- ➔ Why not visit the Council's biodiversity web pages and the section on priority habitats and species in the county: <https://bit.ly/3gsZgyP>
- ➔ Discover what is in your area – take a closer look at what is around you – let us know. It's amazing!
- ➔ Manage areas in your local school, village and gardens for wildlife – make space for Nature.
- ➔ Get involved with a local conservation group – volunteer some of your time for Nature.
- ➔ For a range of ideas visit: <https://bit.ly/2EENrZ6>

## Help record the species in your area

West Wales Biodiversity Information Centre (WWBIC) is a valuable source of information about the county's wildlife and anyone can contribute. Common species are often under-recorded so you don't need to be an expert.

WWBIC holds a lot of biological records for Llanboidy-Whitland (see the map above) but there are two 1-km square with 0 records and 13 with less than 10 species records. Can you help fill in these gaps?

Why not record the species that you see in your garden or when you are out and about? There are several ways you can record with WWBIC, by email, on the WWBIC website or using the LERC Wales App. More information can be found here: <https://www.wwbic.org.uk/wildlife-recording/>

There are many websites that can help with species identification. If you are on social media why not join West Wales Biological Recording (<http://www.facebook.com/groups/westwalesbiorecording/>)

## Special sites in your area

This map highlights places to walk in Llanboidy-Whitland.

➡ In Carmarthenshire we have a network of 'designated' sites, protected at a national or international level – these are the best examples of particular habitats in Carmarthenshire or even the UK and/or places where important species live. They are the cornerstones of conservation work, protecting the core of our natural heritage.

Want to find out more? Visit the Natural Resources Wales website - <https://bit.ly/2YwEybo>.

**NB. These protected sites do not necessarily have public access unless they have a Public Right of Way passing through them or are Open Access Land (see next page).**

➡ Locally we also have nature reserves with important habitats and species which are managed by a range of organisations. Find out more at: <https://bit.ly/2LcLJkM>

➔ Your ward has a network of Public Rights of Way (PROW). These footpaths are open to everyone to enjoy and a great way for you to explore your local area and the habitats and wildlife within it. The county also has areas of 'Open Access land'.

➔ 'Open Access land', under the CROW Act (2000), consists of open country (mountain, moor and heath land) and 'registered common land. It also includes areas of 'dedicated land' where owners, such as Natural Resources Wales, allow free access.. In these areas you can walk wherever you like, and in the NRW managed forests you can also ride a horse or a bike on the forest tracks, but please be considerate of other users.

Find out more at: <https://bit.ly/3n2tahp>

➔ PROWs include Footpaths, Bridleways, Restricted Byways and Byways Open to All Traffic. There are over 2400 km of PROW across Carmarthenshire providing different levels of off road public access from walking to horse riding and cycling, each has its own unique character, you may already have your own favourite. Find out more at: <https://bit.ly/2K7k9VK>

➔ The maps in this profile are Ordnance Survey maps (OS) – they are a great way to help you find local Public Right of Way and Open Access Land either through paper maps or through their phone App. Find out more at: <https://bit.ly/2Wi52Mo>

➔ The County also boasts numerous designated cycle paths, many of which make up part of the National Cycle network and Carmarthenshire's Active Travel network. There is over 100 km of designated cycle path in the county. Find out more at: <https://bit.ly/3gQopVC> and <https://bit.ly/3gPcck8>

➔ When you are out and about - always follow the Countryside Code: <https://bit.ly/37hFjJS>

## Local Walks/sites to explore

You may already have your own favourite walk in your patch, where you experience the seasonal changes throughout the year. You may walk the same route regularly, but wildlife will not. So, keep your eyes peeled there is always something new to see/experience. But why not try walking another way? You might see something different but also the same sights – just in a different way.

Please tell us about your favourite walk or place to visit - here are some ideas.

## General

➔ There are four local **Ramblers** groups in Carmarthenshire that explore the county. Find out more about the Ramblers' groups in Carmarthenshire: <https://bit.ly/3r6xZZn>

➔ **Walking Well Carmarthenshire** is an initiative which aims to encourage people of all ages and abilities to take advantage of the physical, social and mental health benefits offered by walking in groups of like-minded people. It does this by setting up walking groups around the County. Find out more: <https://bit.ly/2J48FCc>

➔ The **Discover Carmarthenshire** website promotes local walk and cycle routes: <https://bit.ly/3r35xYi>
