

Wildlife in your Ward – Llangeler

The Carmarthenshire Nature Partnership has produced this profile to highlight some of the wildlife, habitats, and important sites in your local area.

Carmarthenshire is justly celebrated for the variety within its natural environment, from the uplands in the north-east of the county to our magnificent coastline.

Every ward contributes to the rich and varied network of wildlife habitats that make up the county, whether that be woodlands, grasslands hedgerows, rivers or gardens.

There are still gaps in our knowledge about Carmarthenshire's natural environment and the wildlife it supports. Despite having a wealth of data, some species and pockets of special habitats

remain unrecorded and unmapped. There is always more to find out.

Wildlife and our natural environment reflect local culture and past human activity. We see this in the field and hedgerow patterns in our agricultural landscapes, and in areas previously dominated by industry where, today, new habitats develop on abandoned land. And our farm, house and street names provide clues to the history of our natural environment.

The mosaic of habitats in Llangeler make up an **ecological network**. If these habitats are well managed, are well connected and are sufficiently extensive, they will support a diversity of species and help to make a **resilient** natural environment.

A **resilient** natural environment supports wildlife and provides a range of **ecosystem services**, e.g. agricultural products, pollinators, timber, drinking water, regulation of floods and soil erosion, carbon storage and recreation and inspiration. Find out more at:

<https://bit.ly/3u1zNvp>

We hope it you will find this profile interesting and that it might encourage you to explore your local area and record what you see. There are links in the profile that will help you to find out more and take action locally.

Thank you to all those in Llangeler who have already sent information and photos. These profiles can be updated so please continue to send us information about the Wildlife in your Ward'.

Funded by Welsh Government through the Local Nature Partnership Cymru project.

Llangeler Ward

Llangeler is a ward dominated by river valleys. The Teifi moves in and out of deeply incised wooded gorges, where the current is fast and a more open, pastoral, tree-rich river valley landscape, where the river moves at a more leisurely pace. The tributary valleys, e.g. the Bargod are characterised by steep wooded slopes, and small pockets of species-rich grassland rich in biodiversity, particularly invertebrates. In these valleys the legacy of the woollen industry is evident in the stone roadside cottages and mills.

Where the agricultural land is most productive hedgerows tend to be regularly cut, but across much of the ward there is a network of wide hedgerows around relatively small fields all contributing to ecological connectivity. To the south of the ward the higher land is more open and exposed, with pockets of marshy grassland. Field boundaries are more often grassy banks and fences, there are far fewer hedgerows and trees. In the roadside banks that cross this area you can see remnants of former heathland vegetation that would have covered this area in the past.

Special species in your ward

All the species in your ward are important in some way and help make your natural environment special. Some of the species recorded in Llangeler are listed by Welsh Government as being of principal importance for biodiversity in Wales – so your area is important. Here are some species highlights from your ward.

	The violet coral is a distinctive, coral-like fungus that has an intense deep violet colour. A number of erect branches grow out of a thick stem. The branches divide and the ends have shallow forks with blunt tips. Its striking colour and form make it easy to spot, but it is scarce in the UK.
	The brown hairstreak butterfly was once very widespread in Wales but has declined severely due in part to intensive hedgerow management. One of its remaining strongholds is Carmarthenshire. The adults are hard to spot but look for their eggs on young Blackthorn in the winter.
	Brook lamprey are jawless fish and the smallest of the UK lampreys. After hatching they bury themselves with just their mouths at the surface, and then spend the next 5 years or so feeding on plant and animal debris which washes past. There are few records in the count – including your ward.
	A plump-looking bird of woodlands, hedgerows, orchards, and gardens bullfinches are often seen in pairs with the bright male and duller female. Shy and secretive, they usually nest in shrubs, such as hawthorn and blackthorn. Look out for them along local hedgerows as you drive along.
	The lesser redpoll is a small finch of mixed woodland, birch scrub and wet woodland. It spends much of its time feeding on seeds and invertebrates in tall trees, especially birch, alder and larch. There is a lack of data on this species – can you help with records?

How can you help?

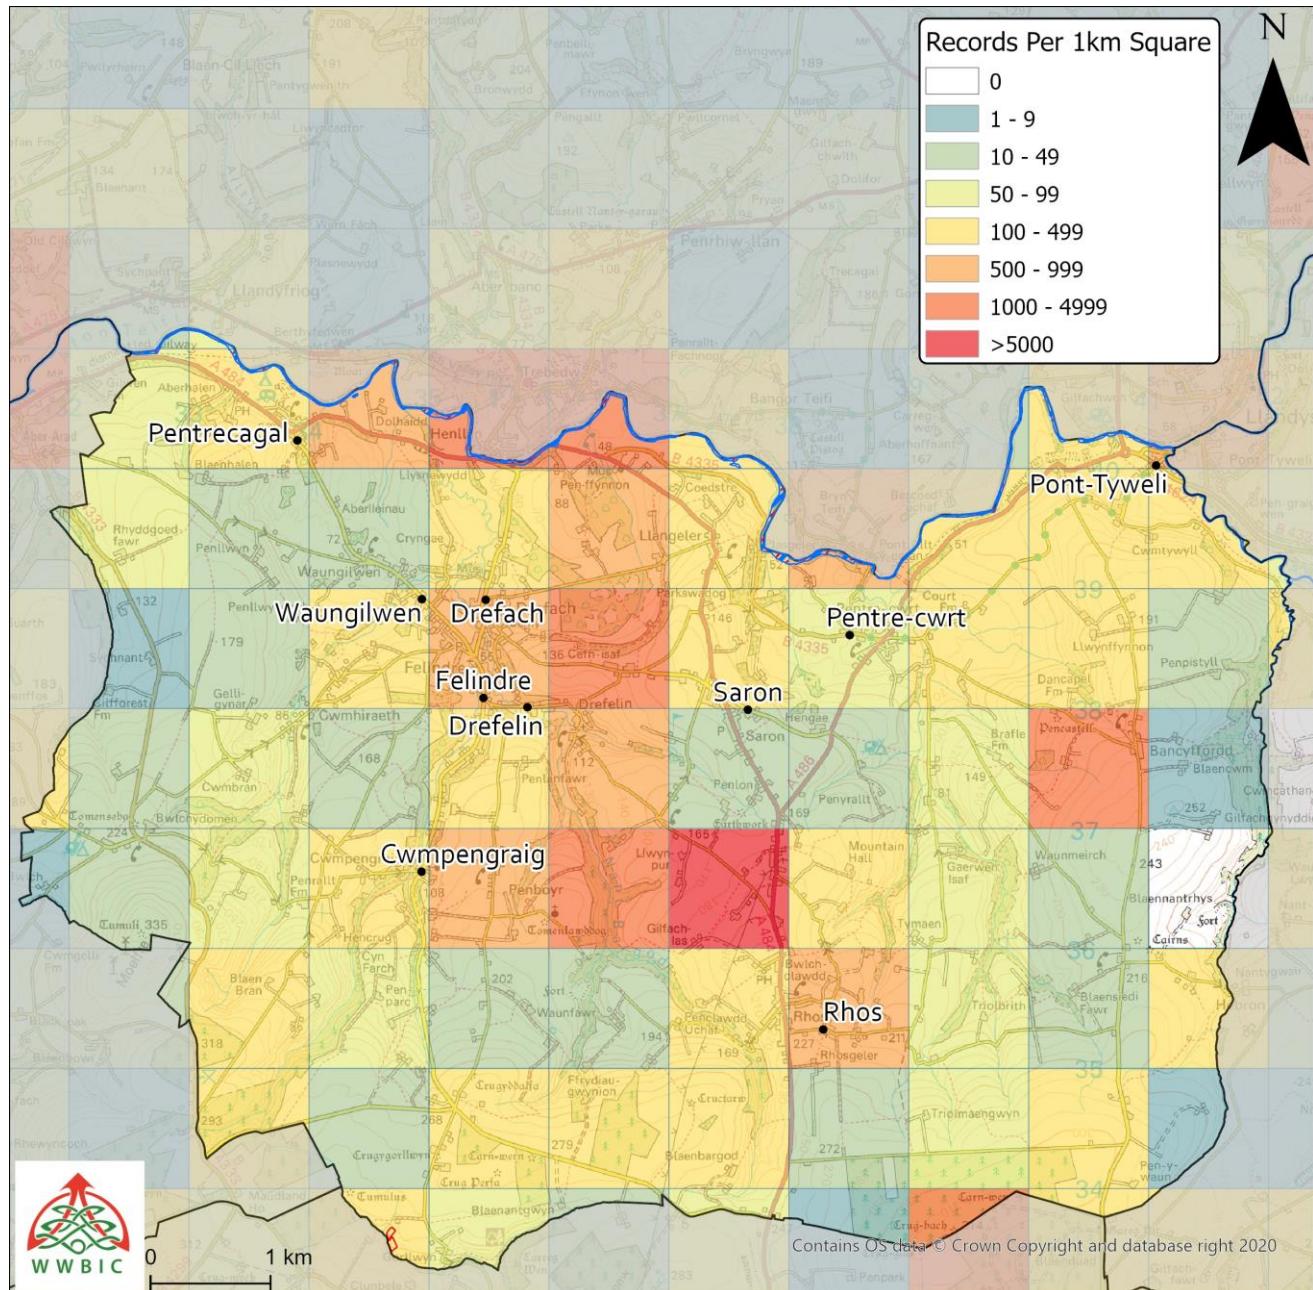

If we want to protect the wildlife in Llangeler, help from people who live here can make a real difference. There are many groups and individuals recording their local wildlife and managing areas for Nature in the county.

- ⦿ There are 203 species of moss but only 11 species of lichen recorded in your ward.
- ⦿ Why not visit the Council's biodiversity web pages and the section on priority habitats and species in the county: <https://bit.ly/3gsZgyP>
- ⦿ Discover what is in your area – take a closer look at what is around you – let us know. It's amazing!
- ⦿ Manage areas in your local school, village and gardens for wildlife – make space for Nature.
- ⦿ Get involved with a local conservation group – volunteer some of your time for Nature.
- ⦿ For a range of ideas visit: <https://bit.ly/2EENrZ6>

Help record the species in your area

West Wales Biodiversity Information Centre (WWBIC) is a valuable source of information about the county's wildlife, and anyone can contribute. Common species are often under-recorded, so you don't need to be an expert.

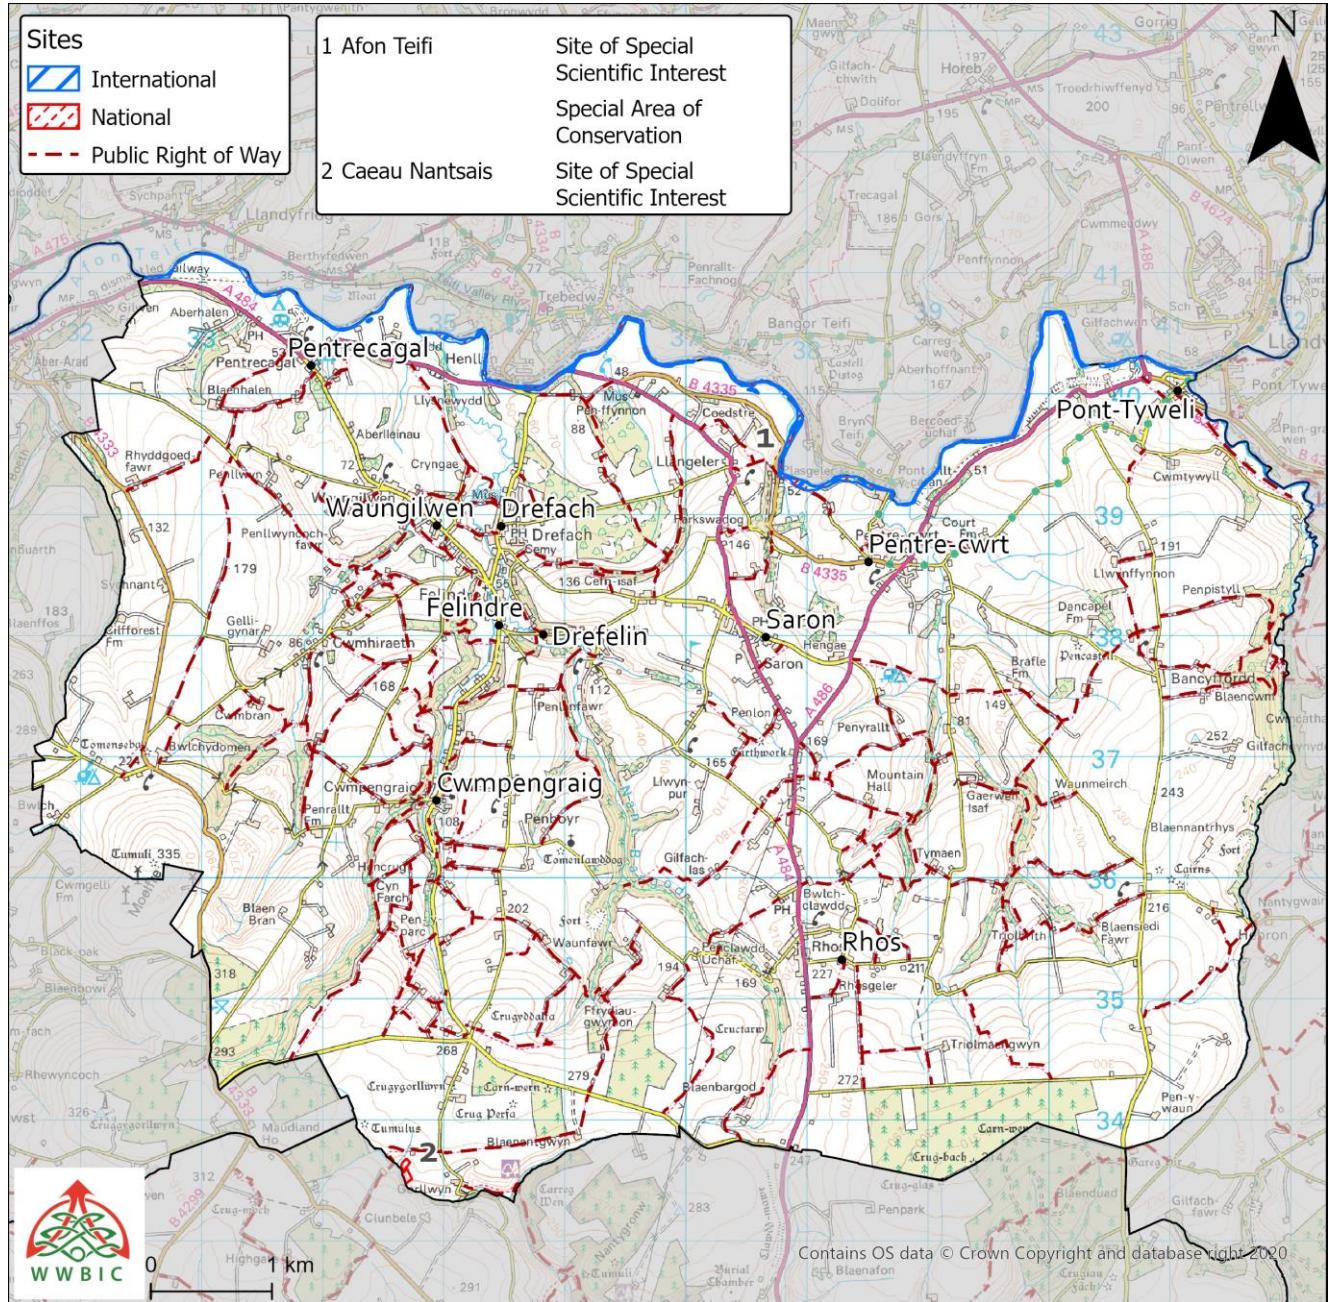

WWBIC holds a lot of biological records for Llangeler (see the map above) but there is one 1-km square with 0 records and three with less than 10 species records. Can you help fill in the gaps?

Why not record the species that you see in your garden or when you are out and about? There are several ways you can record with WWBIC, by email, on the WWBIC website or using the LERC Wales App. More information can be found here: <https://www.wwbic.org.uk/wildlife-recording/>

There are many websites that can help with species identification. If you are on social media why not join West Wales Biological Recording (<http://www.facebook.com/groups/westwalesbiorecording/>)

Special sites in your area

This map highlights the special sites for wildlife in your ward and also places to walk in Llangeler.

⦿ In Carmarthenshire we have a network of 'designated' sites, protected at a national or international level – these are the best examples of particular habitats in Carmarthenshire or even the UK and/or places where important species live. They are the cornerstones of conservation work, protecting the core of our natural heritage.

Want to find out more? Visit the Natural Resources Wales website - <https://bit.ly/2YwEybo>.

NB. These protected sites do not necessarily have public access unless they have a Public Right of Way passing through them or are Open Access Land (see next page).

⦿ Locally we also have nature reserves with important habitats and species which are managed by a range of organisations. Find out more at: <https://bit.ly/2LcLJkM>

⦿ Your ward has a network of Public Rights of Way (PROW). These footpaths are open to everyone to enjoy and a great way for you to explore your local area and the habitats and wildlife within it. The county also has areas of 'Open Access land'.

⦿ 'Open Access land', under the CRoW Act (2000), consists of open country (mountain, moor and heath land) and 'registered common land. It also includes areas of 'dedicated land' where owners, such as Natural Resources Wales, allow free access.. In these areas you can walk wherever you like, and in the NRW managed forests you can also ride a horse or a bike on the forest tracks, but please be considerate of other users.

Find out more at: <https://bit.ly/3n2tahp>

⦿ PROWs include Footpaths, Bridleways, Restricted Byways and Byways Open to All Traffic. There are over 2400 km of PROW across Carmarthenshire providing different levels of off road public access from walking to horse riding and cycling, each has its own unique character, you may already have your own favourite. Find out more at: <https://bit.ly/2K7kgVK>

⦿ The maps in this profile are Ordnance Survey maps (OS) – they are a great way to help you find local Public Right of Way and Open Access Land either through paper maps or through their phone App. Find out more at: <https://bit.ly/2Wi52Mo>

⦿ The County also boasts numerous designated cycle paths, many of which make up part of the National Cycle network and Carmarthenshire's Active Travel network. There is over 100 km of designated cycle path in the county. Find out more at: <https://bit.ly/3gQopVC> and <https://bit.ly/3gPcck8>

⦿ When you are out and about - always follow the Countryside Code: <https://bit.ly/37hFjS>

Local Walks/sites to explore

You may already have your own favourite walk in your patch, where you experience the seasonal changes throughout the year. You may walk the same route regularly, but wildlife will not. So, keep your eyes peeled there is always something new to see/experience. But why not try walking another way? You might see something different but also the same sights – just in a different way.

Please tell us about your favourite walk or place to visit - here are some ideas.

General

- ⦿ There are four local **Ramblers** groups in Carmarthenshire that explore the county. Find out more about the Ramblers' groups in Carmarthenshire: <https://bit.ly/3r6xZZn>
- ⦿ **Walking Well Carmarthenshire** is an initiative which aims to encourage people of all ages and abilities to take advantage of the physical, social and mental health benefits offered by walking in groups of like-minded people. It does this by setting up walking groups around the County. Find out more: <https://bit.ly/2J48FCc>
- ⦿ The **Discover Carmarthenshire** website promotes local walk and cycle routes: <https://bit.ly/3r35xYi>
