Area (HA)	237,035		2,073,511		15,101,354	
Population Density	0.8		1.5		3.7	

Definitions:

Usual Resident Population

The main population base for outputs from the 2011 Census is the usual resident population as at census day 27th March 2011. Although the population base for enumeration included non-UK short-term residents, this population is analysed separately and is not included in the main outputs from the 2011 Census. All outputs, unless specified are produced using only usual residents of the UK.

For 2011 Census purposes, a usual resident of the UK is anyone who, on census day, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.

Schoolchildren and students in full-time education studying away from their family home are treated as usually resident at their term-time address. Basic demographic information (name, sex, age, marital status and relationship) is collected at their non term-time address (their 'home' or 'vacation' address). The information on families, household size and household composition for their non term-time address does not include them.

Population density is the number of usual residents per hectare. A hectare is the metric unit of area defined as 10,000 square metres of approximately 2.47 acres.
