

# Stage 2

## LEA collects advice from Professionals

- The local authority will request information from a number of people about your child's needs; this may include the school or nursery, the health authority, social services or any other professionals with knowledge of your child.
- There will also be an assessment by an Educational Psychologist.

## Parents and Child/Young Person give their views

- You will be given the opportunity to express your views about your child's needs.
- This can be completed using the pro-forma questionnaire that is sent, or in any other format which suits.
- Your child will be encouraged to give their views; the Additional Learning Needs Family Support Worker can assist with this.
